

INTRODUCING XIHE TECHNOLOGY

Engineering for Life. Precision for Health.

A deep-tech healthcare platform bridging advanced materials science and fundamental cellular biology to restore human homeostasis.

Chapter I

THE ORIGIN

THE TURNING POINT

The Agony of My Father's Silent Battle.

A personal mission born from the struggle of chronic metabolic imbalances
and the quest for manual regulation that life shouldn't require.

Witnessing the Blackout

My father lived through the complex, intersecting burdens of metabolic vulnerability. I watched my mother act as a relentless manual regulator—meticulously attempting to manage fluctuating vital metrics.

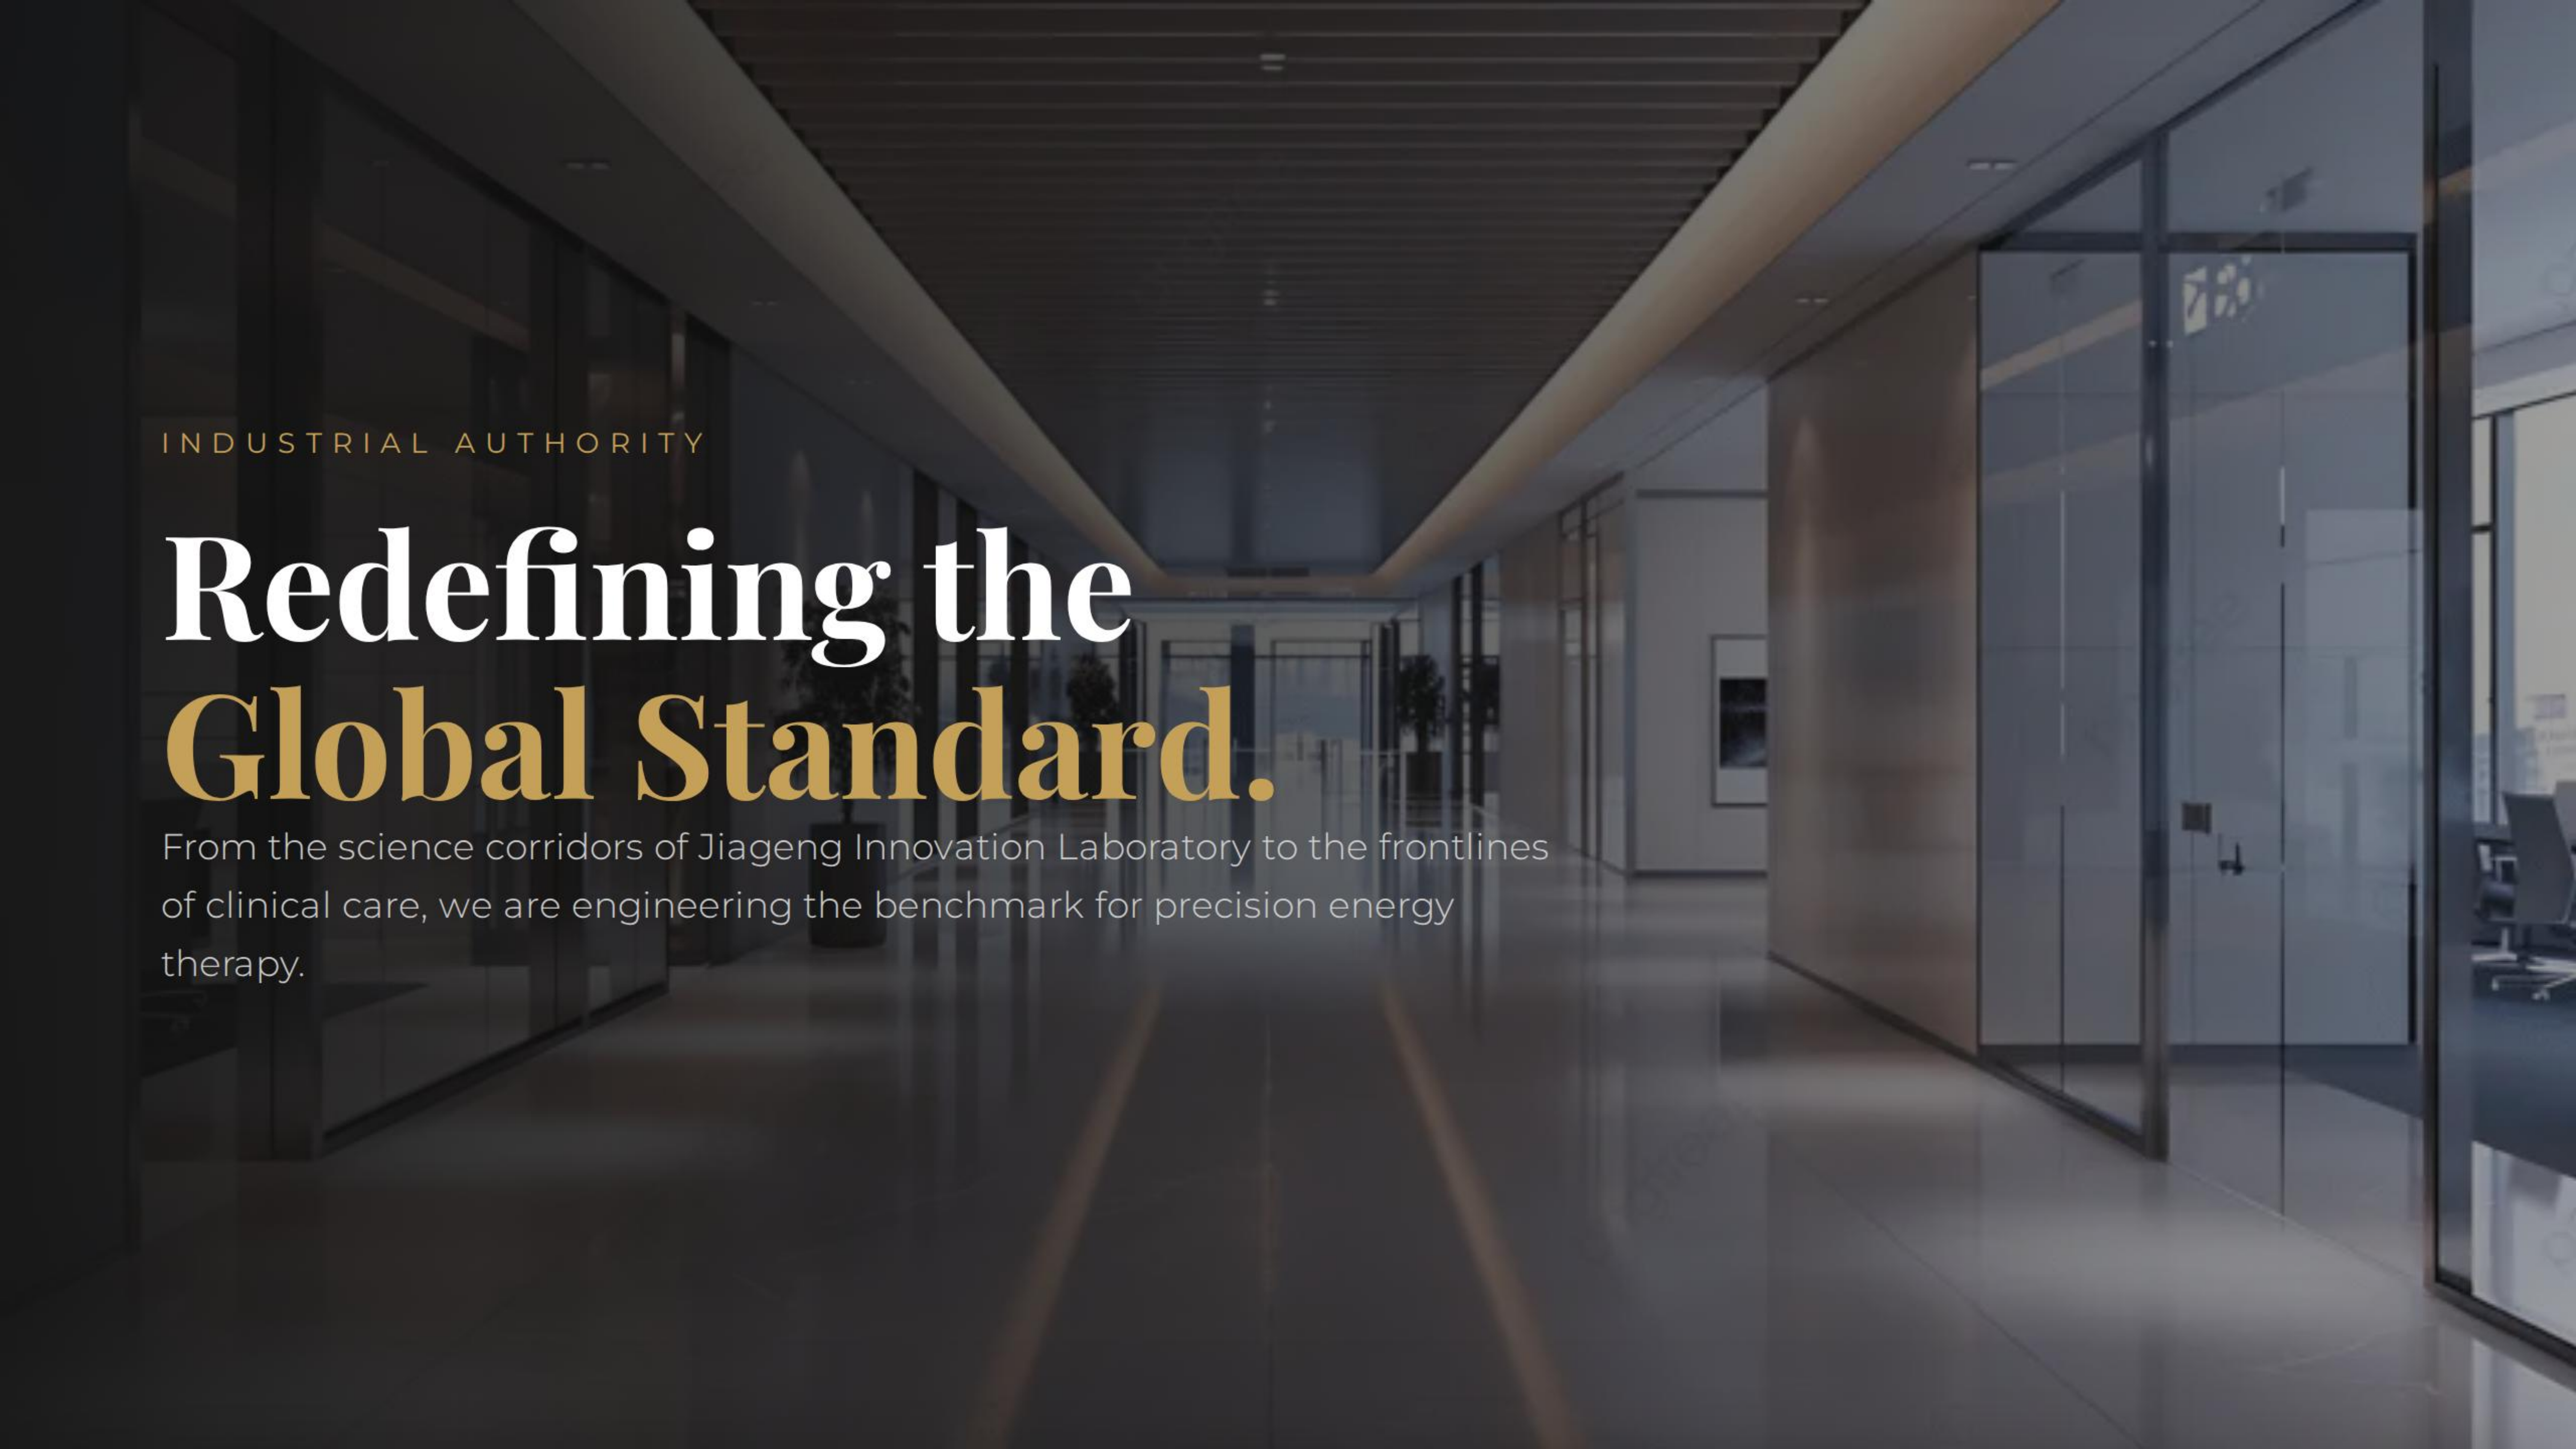

When his internal cellular fuel reserves plummeted, his irritability and exhaustion were never flaws of character; they were deep physiological cries for help—a **silent mitochondrial blackout**.

This realization moved me from grief to innovation. Suffering shouldn't rely on chaotic manual modulation. It requires **molecular precision**.

Chapter II

THE MISSION

INDUSTRIAL AUTHORITY

Redefining the Global Standard.

From the science corridors of Jiageng Innovation Laboratory to the frontlines of clinical care, we are engineering the benchmark for precision energy therapy.

State-Level Backing

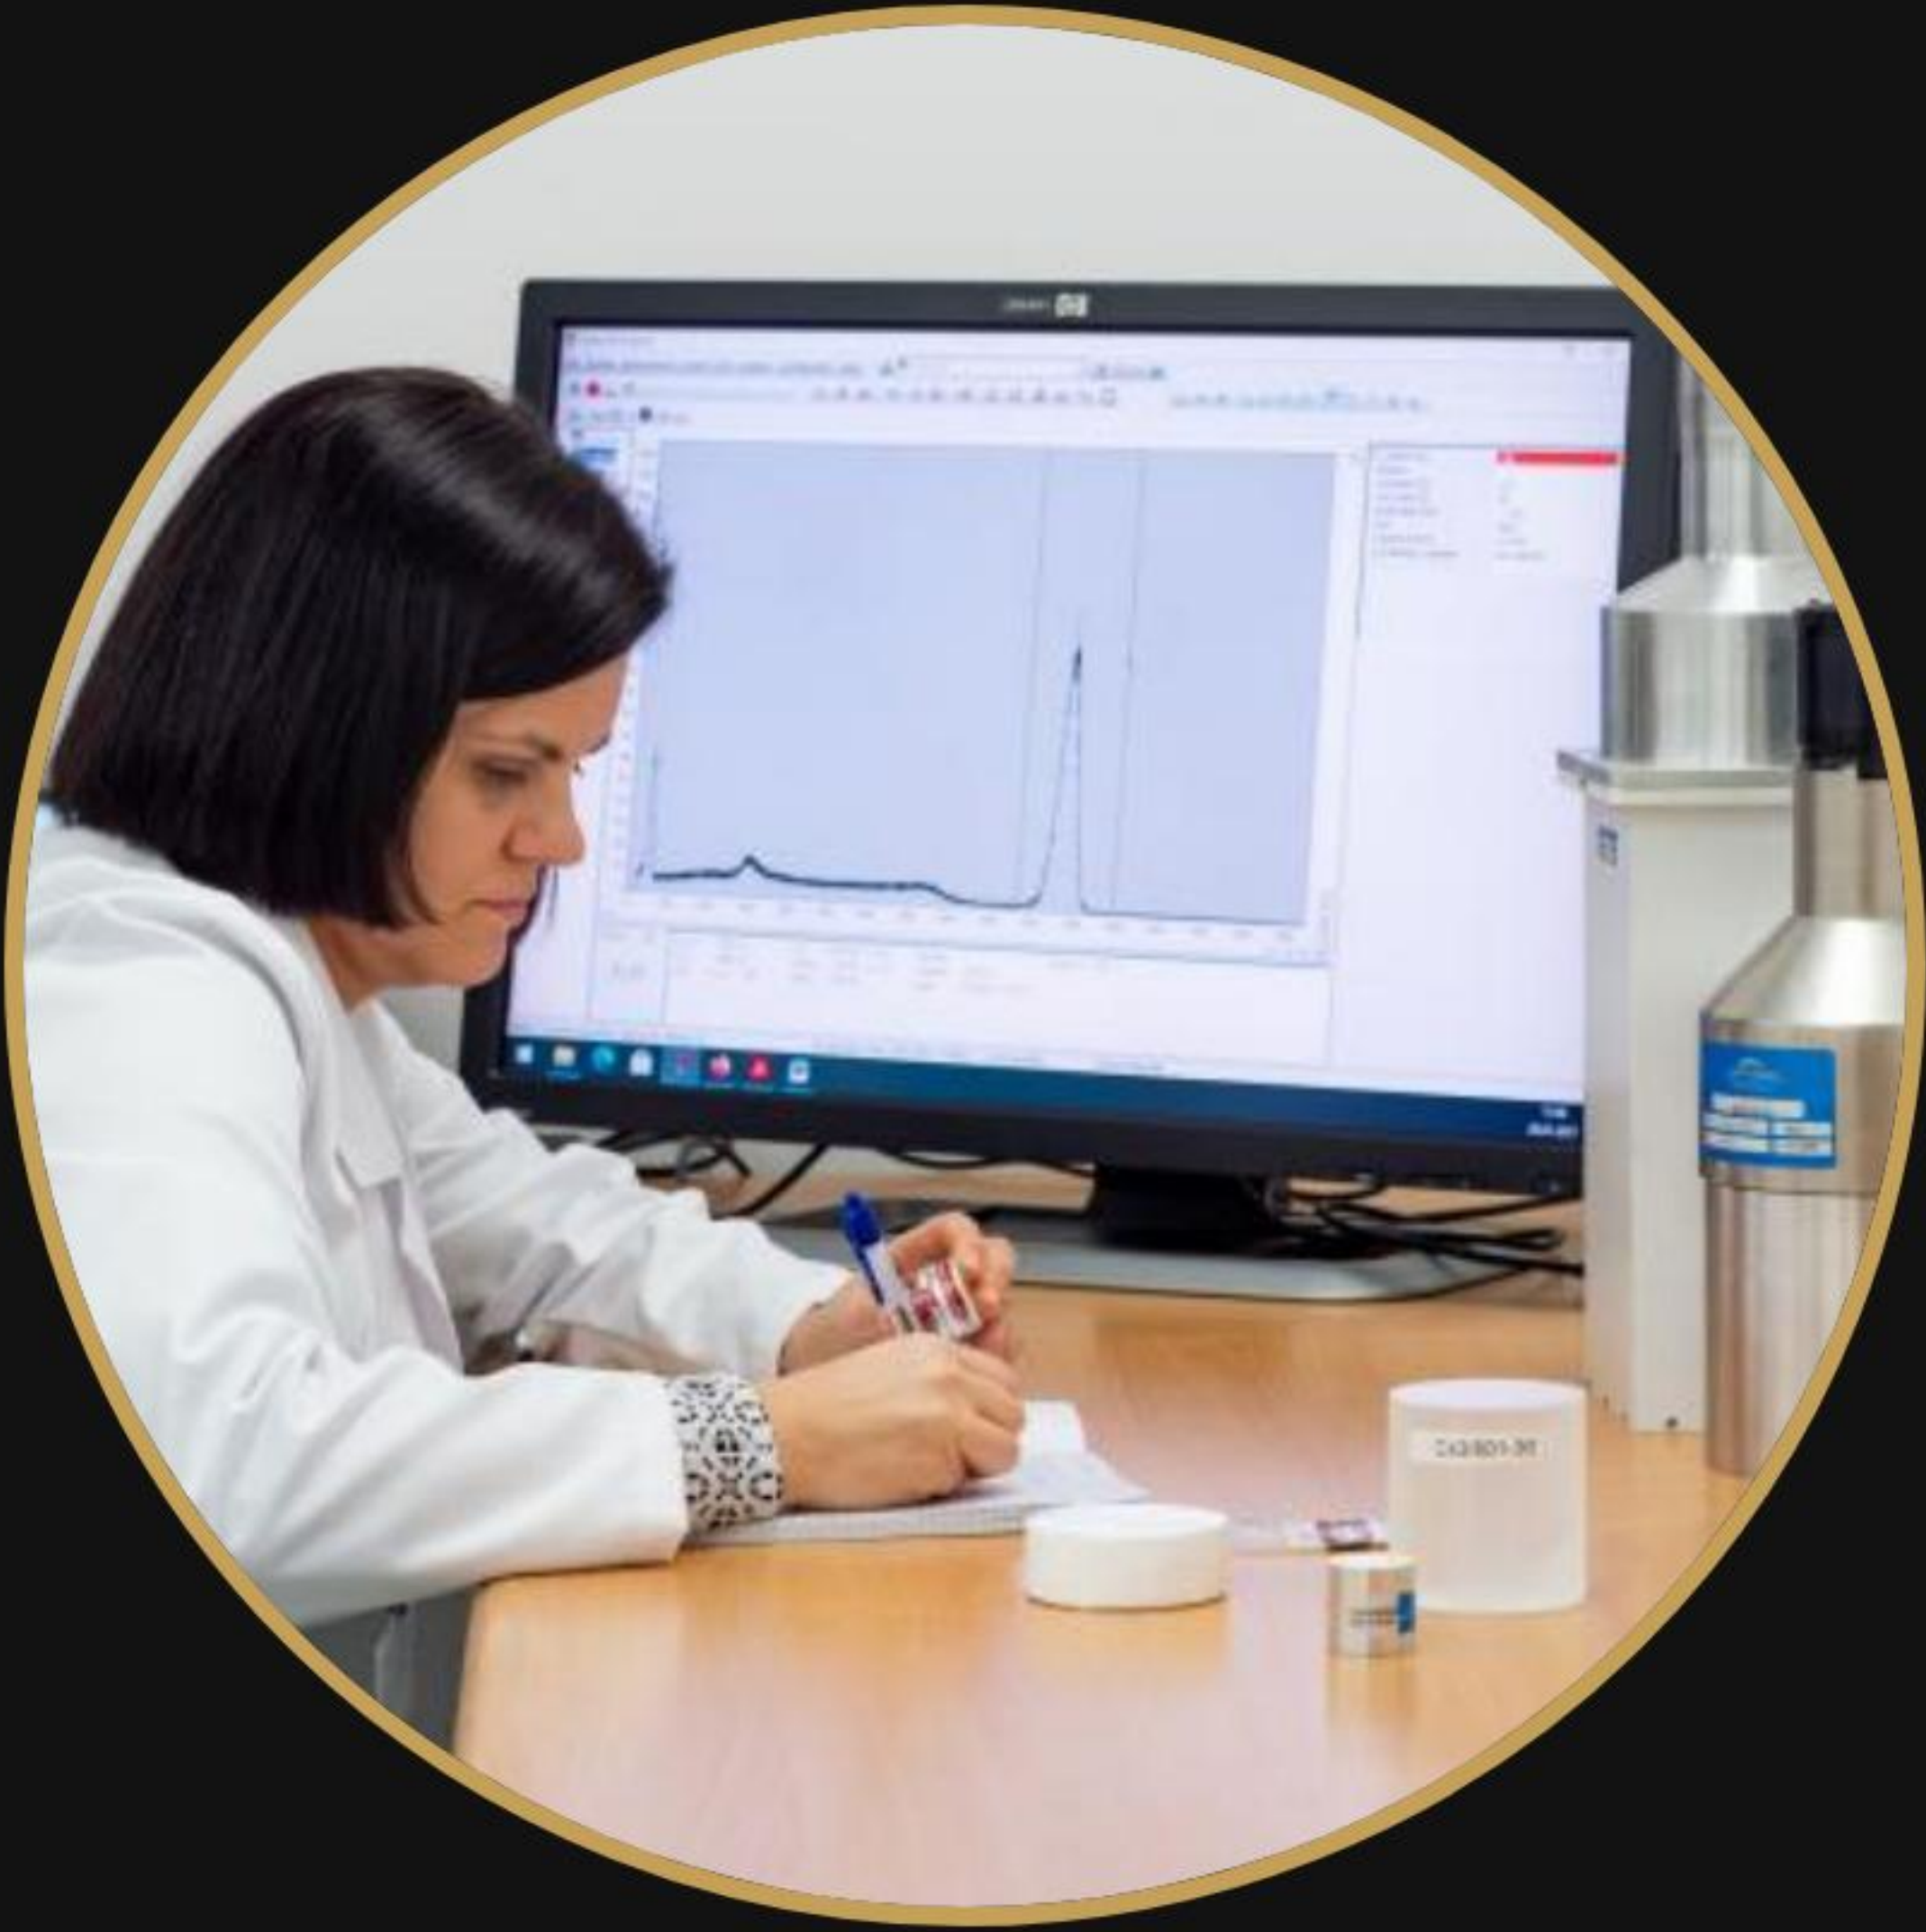

55%
IKKEM JOINT EQUITY

Leading National Standards

As the **Lead Drafting Unit** for the Graphene Flexible Electrothermal Film National Industry Standard (**Standard 2024-0923T-YB**), XIHE replaces superficial thermal modulation with pure, intrinsic bio-energetic replenishment.

We do not simply follow industry standards—we define them. Our mission is to ensure every unit of energy delivered is calibrated to the exact needs of cellular biology.

The Scientific Ecosystem

Global Vision, Localized Precision

XIHE's innovation is validated by the world's most distinguished minds. Our collaboration with **Nobel Laureate Konstantin Novoselov** ensures that our graphene technology remains at the absolute frontier of materials science.

By integrating Nobel-tier physics with medical engineering, we translate elite scientific assets into transformative, life-affirming solutions.

Chapter III

THE PHILOSOPHY

THE BIOLOGICAL SOUL

The Biology of Homo-Resonance.

Resonance is not just a measurement; it is a return to nature. We engineer the bridge back to biological harmony.

The Three Pillars of XIHE

Precision

Moving beyond chaotic manual modulation to precise, measured infrared frequencies at $9.4\mu\text{m}$.

Resonance

Facilitating "Homo-resonance"—where technology fades and the cell's natural dialogue begins.

Restoration

Restoring homeostasis to fragile cellular ecosystems, returning the body to its innate balance.
